

DURAMOLDTM **cabinet**

- award-winning,
space-age design
- lightweight
- maximum security
- virtually
indestructible

DURAMOLD™

for play that goes on... and on... and on

The exciting duramold cabinet attracts players with an award-winning, space-age design, catching the eye and the imagination and offering a new amusement experience. And it keeps play going strong with one tough body that's virtually indestructible.

The duramold meets Williams' high standards of quality, design, reliability and security. Molded of hi-density polyethylene and built to last, the cabinet is lightweight (approximately 25% lighter than the standard upright), completely serviceable without removing any exterior parts and ruggedly secure with a rear door, 3-point locking system and all-new cashbox locking bar. Even the finish has staying power, holding color fast so that it can't fade or chip!

All these "new and improved" features mean "new and improved" benefits for the operator. The cabinet's fantastic durability prevents shipping damage for a game that can go straight from the box to the floor. Its lighter weight makes any game easier to move and its sophisticated locking system and incredible toughness mean peace of mind when the game is on location.

The first duramold cabinet showcases BLASTER, a game created for lots of play in a cabinet that can take it! And location testing shows that the ultra-modern cabinet styling has even stronger earning power!

Duramold. A strong case for Williams games.

SERVICE

For the back-up that keeps you out front, call Williams toll-free at 800/621-1253. In Illinois, call toll-free at 800/572-1324.
